KHABAROVSK SCHOOL ATTENDANCE POOR -- Tikhookeanskaya Zvezda, No 138, 14 Jun 49

The main deficiencies in the Khabarovsk Kray school system are poor attendance, the large number of children repeating classes, and the failure to fulfill the law on universal education. In the first 6 months of the 1948 - 1949 school year, one out of four students failed to attend school in Vyazemskiy and Bikinskiy Rayons, Nizhne-Amur Oblast, and the Koryak and Chukot National Okrugs, and the situation did not improve in the second half of the

school year. There has been too much selection of students in Kamchatka and Nizhne-Amur Oblast schools. School installations in the Jewish Autonomous Oblast and Khabarovsk Rural Rayon are in need of considerable repair.

Universal, obligatory 7-year schooling for children will be carried out in the rural rayons this coming school year, having already been established in the cities. In September, all students who have completed primary school, totalling more than 20,000 children and including 9,300 rural youths, will be accepted into the 5th class. For this purpose, 20 new 7-year schools must be opened in the villages. The number of boarding schools must be increased from 148 to 186, and their students from 4,376 to 6,160. More than 17 million rubles have been allocated to the building and equipping of these boarding schools. A particularly extensive network of boarding schools is being created in Kamchatka and Nizhne-Amur oblasti, and Nanayskiy and Komsomol'skiy rayons. New boarding schools are being organized also in Khabarovskiy, Vyazemskiy, and Bikin'skiy rayons and in the Jewish Autonomous Oblast, but they are far from being ready for use.

The Khabarovsk Kray Executive Committee has approved a detailed plan of school preparation for the new year, with particular emphasis on the material needs of the schools. By 15 August, all schools must be repaired and be in good order, having a year's supply of fuel, all necessary furniture and equipment. In all rayons and cities this work will be directed by a commission headed by chairmen of the executive committees or their deputies.

More than 1,300 teachers must complete month courses in the summer to advance their qualifications. These courses are given by the Khabarovsk Institute for the Advancement of Teachers and by pedagogical schools throughout the kray. -- I. Chistyakov, chief, Khabarovsk Kray Department of National Education.
